

CSR

LIONS CLUB OF NAIROBI CARGEN TREE PLANTING.

Loss of biodiversity, through land degradation and drought, is a serious threat to the sustainable development activities across Kenya and the continent of Africa. This is often intensified by the lack of knowledge and skills on sustainable land management practices and forest biodiversity conservation.

Low levels of awareness and sensitization of the advantages of land restoration, combined with poor regulation of resources, and lack of consideration for the interests of local communities, often leads to poor public support and participation towards tree conservation and the conservation of other natural resources.

Car & General through Lions Club of Nairobi Cargen is dedicated to making the world a better place to live in by contributing to the well of the Communities around us through reversing the effects deforestations and destruction and plant cover.

On Saturday 10th June 2023, Lions Club of Nairobi Cargen had the opportunity to plant trees at 2 schools in Kitengela. The Cargen Lions visited Dr. Likimani Primary School; a government institution that hosts 700 students. Here they planted 250 trees. The also visited The Thorn Groove School; a private primary school that hosts at least 400 pupils. Here the club planted 20 tree and donated 130 trees to to schools Agriculture club for planting.

Our Vision

Make customers smile in every street, every town

Our Mission

To achieve leadership position in all our primary markets - power generation, automotive and engine-related products in East Africa.

Tamara Asonga,
Public Relations Executive.
