CAR & GENERAL (KENYA) PLC SUMMARY CONSOLIDATED AUDITED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 DECEMBER 2024

COMMENTARY ON RESULTS

The twelve-month period from 1 January 2024 to 31 December 2024 was challenging. The Kenyan market remained constrained and, specifically, the boda boda business continued to decline to a monthly average of 4600 units from a peak of 20,000 units per month in 2022. This inevitably had a significant impact on our Kenya consumer busin and our Watu Kenya boda financing business. Fortunately, we had commenced the transition to other business lines and entities which allowed operational sustainability

The Group reported a 23% decrease in turnover compared to the prior year 15-month financial year. Sales in Uganda and Tanzania now represent over 58 % of Group sales. Given the drop in boda boda sales, our Kenyan consumer business remained under strain. We compensated with the growth in Cummins and Tanzania

As a result of the above, turnover for the twelvemonth period ended 31 December 2024 was Shs 21 billion against Shs 27 billion achieved in the fifteen-month period ending 31 December 2023. EBITDA (Earnings before interest, tax, depreciation and amortization) was Ksh 1.5 billion compared Ksh 2.1 billion in prior year. The Group made a profit after tax of Ksh 526 million against a loss after tax of Ksh 273 million made during previous financial year primarily due to favourable foreign exchange rates.

In spite of many challenges, there are notable achievements

- Our consumer business growth in Tanzania particularly in the two and three-wheeler
- The performance of our Cummins business
- The return to profitability of our Kibo business.
- The progress of Watu Simu which is a significant new product line for Watu.
- The working capital rationalization in Kenva.
- Our commitment to the transition to greener energy is taking shape and through our associates, we have successfully launched electric 2 wheelers in Uganda and Kenya and have built over 200 battery swap facilities

Going forward, we believe uncertainty will persist in 2025 given the challenging global geopolitics. We do, however, expect less turbulence in East Africa. Key to success will be maintaining strict fundamentals in terms of higher efficiency levels in all areas of our business, maintaining market share in core products and achieving satisfactory profitability across all businesses. We have made all necessary manpower and infrastructure investments, and we now need to

improve efficiencies and increase margin to ensure profitability given the uncertain operating environment.

We now have a more balanced business with five distinct business lines being automotive and equipment distribution, real estate investment, financial services, poultry and now helmet manufacturing. This diversity coupled with a broader geographical reach builds sustainability, and we are confident that each line offers scope for growth.

Going forward, we are well positioned to deliver on our Triple P bottom line - People, Planet and Profit. We are already having a significant impact on millions of lives in terms of delivering daily livelihoods and entrepreneurship opportunities. We will now continue to focus energy on electric and Compressed Natural Gas (CNG) vehicles in Tanzania. With our symbiotic relationship with Watu, we can play a significant role in transforming the 2-wheeler and 3-wheeler market towards electric and compressed natural gas. This will play a positive role in reducing our carbon footprint over the coming years. We will also continue to drive smart-phone connectivity across the continent. This significantly improves livelihoods.

The current financial year will be critical to future success and will require a growth in market share in all sectors. Our primary concern is to ensure that we stay ahead of competition in our key markets in all respects. The quality of competition is increasing.
